Address : SHYAMPET, Hunter road, Warangal.
Designation : HEAD CONSTABLE.

CARPENTER DETAILS:

Name : KASHOK
Designation : FARMER
Address : HANAMAKONDA, Warangal.

Abstract:

Our product is designed for the sake of farmers. Usually the farmers will supply the fertilizers (urea) to the field with the hands and they have to bend their backbone and apply fertilizers each and every plant and to the root. Especially their process will done to the cotton, chilly,maize....crops etc... We have visited a field of a farmer named L.Babu he has 3 acres of land. we identified the main problem is in application the fertilizers to the crops like cotton and chilly. It is time taking process and stress work on the farmers. He said that apply of fertilizers for each and every plant is time taking and risk involved in it which makes tried after the work. It is the method in which the application of fertilizers as be done by labour in the field since last 3 decades. We have a solution for this work to be done very easily.In order to make the process easily we come up with the idea of making equipment which can be used for the application of fertilizers very easily and it can be done in less time i.e. NUTRITION APPLICATOR FOR CROPS IN AGRICULTURE .
